

Winkhaus Family of Locks

Interchangeable solutions to suit the varying needs of homeowners and tenants

Innovative locks to match your homeowner and tenant's needs

Winkhaus' "Family of Locks" has been highly specified in the social housing sector for over 25 years. All of our products are designed to provide solutions for the varied ability of tenants and their specific needs, whilst complying with the latest requirements of PAS 24 and Police Secured by Design (SBD.) The range of locks shown can be fitted to all door materials, with the same initial routing, and changed out on-site, thereby reducing the time spent by, and cost of, property services and maintenance contractors.

Cobra & Trulock

Enhanced tensile steel hooks to offer increased on-site installation tolerances and reduced operating forces for end users.

- Exclusively used on front entrance and rear doors
- Suits tenants with no difficulty operating standard lift-lever multi-point door locks
- High security PAS 24 and SBD compliant

Thunderbolt

Features two twin chamfered deadbolts specifically designed with increased tolerances for installers.

- 5 Deadbolt locking system
- Ideal for timber door sets
- High security PAS 24 and SBD compliant

autoLock AV2

This sleek, innovative, locking mechanism automatically locks as soon as the door is closed, eliminating the need to lift a handle to engage the lock. It is used extensively with FD30 and FD60 fire doors as the auto locking significantly improves the fire test performance of a door set.

- Ideal for tenants with dexterity issues
- Simply: Shut the door, it's locks and secure
- Upgrade to blueMatic AV2E by adding a motor

blueMatic AV2E

The addition of a motor allows for all the benefits of AV2, but with the added functionality of electronic opening.

- Contact-free unlocking of doors with motorised components
- Compatible with all access control systems (wireless, fingerprint, transponder etc.)
- Simple electrical installation

* Applies to lever/fixed pad handle set. If using a lever/lever handle set, full security is only achieved by turning the key or thumbturn.

autoLock AV3

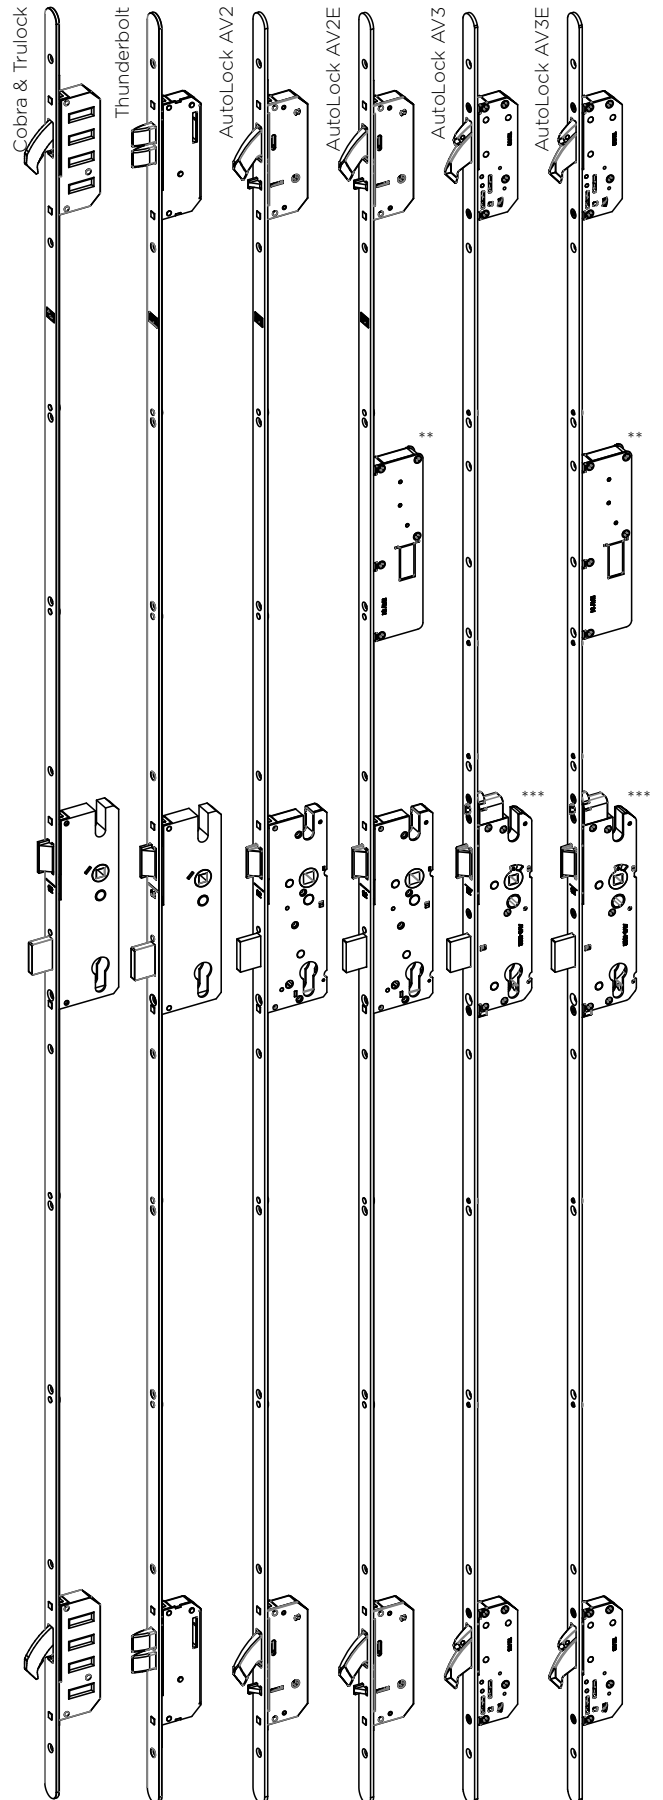

AV3 automatically locks when closed, creates a weather tight seal, and has a practical daytime latch for when tenants require flexible entry from the outside, without a key.

- Innovative Day Latch for flexible entry and exit
- High security PAS 24 and SBD compliant
- Retrofitted upgrade of AV3 to AV3E made possible with modular design

blueMatic AV3E

The addition of a motor allows for all the benefits of AV3, but with the added functionality of electronic opening. Ideal for tenants who are physically unable to open doors.

- Contact-free unlocking of doors with motorised components
- Compatible with all access control systems (wireless, fingerprint, transponder etc.)
- Simple electrical installation

** Optional pre-routing of door at fabrication stage to allow retrofitting of motor.

*** If considering Autolock AV3 note additional routing required at gearbox.
