

AFFINITY ULTRA STAINLESS STEEL DOOR KNOB

STAINLESS STEEL DOOR KNOB

Technical Information

Assessment Data
Corrosion Resistance: Meets requirements of BS EN 1610:2007 (Grade 5, 480 hours)

Material Specifications
Options: Austenitic 304

- Brushed stainless steel door knob
- Ultimate corrosion resistance
- Includes bolt through fixing
- 70mm knob diameter, 85mm rose diameter
- 66mm projection
- Matching bar handles, numerals and letterplates

QA4F/CNK	SS DOOR KNOB	75 DIA
QA4F/HSB175 (S4)	FIX INCK - SINGLE SHRE BOLT	75
QA4F/HSB175 (S4)	FIX INCK - SINGLE SHRE BOLT	100

We are confident about our products, and we want you to be confident too!

Product Care

Your hardware product should be cleaned regularly in order to preserve its corrosion resistance.

To keep your hardware product in optimum condition we recommend cleaning it a minimum of once per month. More frequently if your home is in areas subject to heavy soiling or frequent use.

Cleaning Guide

1. All surfaces should be wiped with a soft clean cloth, warm water and a mild detergent.
2. Take care to wipe away all residue and dry with a soft clean towel.
3. Only use cleaning materials which do not impair the anti-corrosion properties of the surface coatings.
4. **DO NOT USE** Carbon steel brushes and steel wool as these can leave particles embedded in the surface which can lead to rusting.

Hardware Warranty

Avocef Hardware products undergo rigorous testing both on mechanical performance and surface coating endurance to a very high standard. While we are confident our hardware products are built (and tested) to last, we want you to be too.

Avocef Hardware offer a 10 Year Mechanical Warranty on all hardware products. Simply follow the product care instructions above and if your hardware product fails it will be replaced.
